Rutgers The State University of New Jersey, Fall 2015, Tue & Thurs 4:30-5:50

For many reasons, there is no uncontroversial general characterization of the range of work that tends to be classified under the heading “Analytic Philosophy”. For our purposes, an analytic philosopher is anyone whose work is conducted in awareness of the fundamental importance, for every variety of foundational and philosophical inquiry, of obtaining a proper understanding of what properties of thought, perception, language, and the world, and what properties of their relationship, make possible the meaningful ascription of truth, falsity, and referential significance of any kind to such things as thoughts, beliefs, sentences, propositions, and judgments. This course covers the early history of analytic philosophy, concentrating largely on writings of Gottlob Frege, Bertrand Russell, G.E. Moore, and Ludwig Wittgenstein, whose work secured recognition of the necessity as well as the great difficulty of this kind of inquiry.
